

LOCATION SCOUT INSPECTION CHECKLIST

Page 1 of 1

A risk assessment must be conducted prior to conduction of a Director's Scout to identify and mitigate exposure to potential site hazards before Production personnel visit the location. Check N/A if the item is not relevant to the location, or if you cannot answer or inspect that item. Consult with your Production and Production Safety Department Representative if site hazards are identified.

Production	Location and Description of where stunt will be performed
Episode Name and #	Shooting Date(s)
Person Completing Checklist	Date Checklist Completed

Please answer all questions. If action required, give brief description. "N/A" means "Non Applicable."
